

innovation, technology and experience in the cashew business  
from raw nuts to packed kernels

**FOOD SAFETY** is now the focus of any food company and suppliers have to guarantee the product specification compliance to their customers.

OLTREMARE proposes its new packing line of the series **CLEANPACK** so that the finished product is vacuum packed and gas flushed in compliance with the strictest food safety rules.

The **CLEANPACK NUTS PACKING LINE** optimizes the logistic operations and costs and increases the product **SHELF LIFE** with minimum use of labour, space and power.

## CLEANPACK NUTS PACKING LINE

*THE MOST EFFICIENT, SAFER, CLEANER WAY TO PACK YOUR NUTS*

**The CLEANPACK NUTS PACKING LINE is composed of :**

- a sieve for heavy foreign matters removal
- an aspiration for light foreign matter removal
- an X Ray sorter for removing glass, stones, metals, ceramics, plastics etc
- an automatic filling and weighing system for 25, 50 Lb packages or Big Bags
- a vacuum packing machine for the packing of 25 and 50 Lb and Big Bags with gas flushing
- a label printer for traceability information as optional
- future possibility to couple the line with a Pasteurizer/Infestation Control System, currently under development, for the microbiological and infestation compliance of the cashews (no Chemical Fumigation)

**Technical features of the CLEANPACK NUTS PACKING LINE :**

- dimensions: 20000x10000x4500 (H) mm
- capacity: 1400 kg/h in input
- compressed air consumption: 20 m<sup>3</sup>/h at 7 bar pressure
- installed power: 17 kW
